

News Release

Telepath Technologies and Excelpoint Sign Strategic Distributorship Agreement

Hong Kong, China, 6 May, 2008 - Leading total solutions provider, Excelpoint Systems (H.K.) Limited and Telepath Technologies Ltd - a company that complies with the China domestic specification, China Multimedia Mobile Broadcasting (CMMB) have jointly announced that both parties have signed the strategic distributorship agreement which Excelpoint will now have the distribution rights to Telepath Technologies' silicon solutions and products in the Asia Pacific region.

Excelpoint Systems (H.K.) Limited Chief Operating Officer, Mr. David Kok said, "Our collaboration with Telepath Technologies will further hone our competitive edge in the area of hand phone solutions while consolidating our leading position in the hand phone terrain. Using Telepath Technologies' low energy consumption and high capability modulating silicon chips, users of Excelpoint's mobile TV handheld device will be able to enjoy a prolonged viewing time of television programmes. Moreover, as Telepath Technologies' silicon solutions and products comply with the CMMB transmission standard while supporting an easy assimilation of the dual functions of the mobile television and hand phone, it can be used to receive mobile multimedia broadcast in not just hand-held devices, but in other modes like personal media players or portable digital devices as well. Hence, beside the mobile TV domain, our R&D will be developing this CMMB to other segments like automotive electronics with more multimedia devices for our customers, to help them shorten their time to market coupled with their price leadership, helping them to gain their competitive edge in the market."

Kathy Li, CEO of Telepath Technologies remarked, “We are glad to have Excelpoint as our distributor. Having accumulated years of experience in hand phone solutions as well as being a member of the CMMB technology work group, Excelpoint’s in-depth involvement in its applications has given us tremendous confidence in our collaboration with them. On top of that, Excelpoint’s vast experience in the hand phone terrain, coupled with their outstanding technical team and extensive distribution network, all led me to believe that our collaboration with them will result in a win-win situation. With this, we will contribute to the development of the CMMB content.”

About Telepath Technologies

Telepath Technologies Co., Ltd. is a newly founded fabless company which mainly offers the CMMB compliant mobile TV chip solutions. Telepath is committed to be the world leading provider for total digital TV chip solutions.

Telepath’s core team consists of Dr. Liu Hui, co-founder of CMMB channel technology and a whole team with rich experience in CMMB mobile TV system application and chip development. Telepath, in cooperation with the strategic partners, Infineon, the world leading semiconductor manufacturer, and SMIC, the leading domestic foundry, has completed the pipeline from concept design to qualification and fully prepared for mass production. This enables Telepath to provide volume commercial demodulator chip and lays the foundations to offer CMMB SoC chips with high performance in the future.

About Excelpoint Systems (H.K.) Limited

Excelpoint is a value-added partner to Asia’s electronics manufacturers. Headquartered in Singapore, Excelpoint began as a distributor of electronic components in 1987. The company has since evolved and grown into a total solutions provider of quality components, engineering designs and supply chain services to OEM (original equipment manufacturers), ODM (original design manufacturers) and CM (contract manufacturers) in Asia.

Working closely with its principals, Excelpoint has a team of dedicated research and development professionals who will identify new trends and developments in the electronics industry to create and test drive new technical features that will complement their customers' products.

The total solutions and reference designs created by Excelpoint for OEM customers are found in a wide range of applications – from medical equipment devices to the VOIP (voice over Internet protocol) devices, and from power protection and metering devices used in the industrial sector to video surveillance devices for homes, commercial buildings and national homeland security projects as well as the wireless communications domain.

Excelpoint also extends its expertise in supply chain management and wide value chain network to its customers, helping them to improve efficiency, manage costs and reduce their time to market.

Excelpoint is listed on the Mainboard of Singapore Stock Exchange since 2004. The company employs over 600 staff and has facilities and offices in 30 cities across Asia and the Pacific, including Singapore, Australia, China, India, Korea, Malaysia, Philippines and Thailand.

Excelpoint Systems (H.K.) Limited is the regional PRC headquarters, with offices that spread over in Shenzhen, Shanghai, Beijing, Chengdu, Harbin, Nanjing, Qingdao, Xiamen and Xi-An.
